

ZoneAlarm Extreme Security NextGen

ZoneAlarm Extreme Security NextGen, is the most comprehensive multi-layered security suite on the market and it stops the most sophisticated viruses and hackers. Developed by cyber security leader Check Point, ZoneAlarm Extreme Security NextGen, uses the latest enterprise grade technology to protect your digital world.

Multi-device
Windows, Android, and iOS

Product Benefits

Complete Next Generation Security for all your devices

ZoneAlarm Extreme NextGen gives the highest level of protection for known and unknown threats across all devices. Advanced behavioral analysis and machine learning algorithms shut down malware before it inflicts damage. Whether you are on your PC or on the run with your mobile device – we are there to protect you.

Privacy by Design

ZoneAlarm guarantees your data stays completely private. All security analyses are made on the device with anonymized metadata collected from the operating system, apps, the web, and networks. With the latest Zero-Day Phishing protection, we ensure you don't give away your credentials on faked websites.

Easy to use and Self-managed

Individuals or small businesses – ZoneAlarm NextGen is easy to use and a self-managed solution. The latest Next Generation enterprise-grade technology is always just a few clicks away.

Real-Time Threat Intelligence

ZoneAlarm leverages the world's most extensive threat intelligence database with Check Point Threat Cloud. Every link that is clicked, no matter if it's in an email, a message on a social media app, etc., is validated in real-time with dynamic security intelligence provided by Check Point Threat Cloud.

Localization

Our Windows client and Mobile apps are available in more than 20 languages.

Product Features

Next Generation Antivirus

ZoneAlarm Extreme NextGen Antivirus uses behavioral blockers and heuristic analysis to detect and remove malware viruses, spyware, keystroke loggers, trojans, rootkits, etc.

Two-way Firewall

Stops Internet attacks at the front door and catches thieves on their way out. The two-way firewall proactively protects against inbound and outbound attacks while making you invisible to hackers.

Advanced-Phishing Protection

Protects your device(s) in real-time from new and unknown phishing sites; using static, heuristic and machine learning techniques. ZoneAlarm scans every URL to prevent you from entering your personal information on websites that want to steal your credentials.

Anti-ransomware

The award-winning ransomware protection detects, blocks and removes ransomware attacks employing behavior-based technologies that don't rely on signature updates. Any encrypted files are immediately restored.

Safe Downloads

Download documents from the web and email without worries. With ZoneAlarm's unique **threat extraction technology**, downloaded files are reconstructed to eliminate potential threats.

Threat Emulation

Prevents new and unknown attacks in executable files. The files are opened in a virtual sandbox, using advanced threat emulation to identify abnormal behavior typical of malware.

Mobile Security

Stay secure from both known and unknown threats, whether the attacks come from the network, applications, the web, or the device itself.

Content Filtering

ZoneAlarm comes with a URL filter for all supported browsers (Chrome, Edge, and Firefox). It lets you exclude inappropriate content based on selected categories, making the internet safer for you and your family.

Technical Support

Free customer support, including in-depth information, forum, and 24/7 live chat.

System requirements

Microsoft Windows 10, 11
32-bit / 64-bit, 2 GB RAM, 2 GHz or faster processor, 1,5 GB of available hard-disk space.

Microsoft .NET framework Version 3.5 or later
